INTRODUCTION

This report presents results obtained from a survey of family food expenditure in Canada conducted throughout 1969. It is the first food survey of national scope since 1949 and was designed to provide information for both urban and rural population. Similar surveys conducted during the past twenty years have referred only to middle-income families in a few major cities.

The results presented here are detailed average food expenditures and quantities for families and unattached individuals living in Canada, within urbanization size groups, and regions. A second part to this report will be published later, and this will be more analytical in content, designed to show the relationships between food expenditures and various family attributes, such as family income and family composition. These will be supplemented by information collected early in 1970 in a national survey covering all family expenses for the year 1969, to be published in a separate series of reports.

SAMPLE DESIGN AND SELECTION

The sample was selected within the framework of the Labour Force area sample. Households were chosen by systematic random sampling from a list of households. A full Labour Force sample was set aside from which a sub-sample was drawn for this particular survey. Contrary to practice in earlier surveys, therefore, the sample was not drawn from a group of households which had been previously included in the Labour Force survey.

The allocation of the sample represented a compromise between samples proportional to population and equal samples. Montreal and Toronto were assigned samples larger than other cities, because of their importance in the Canada average. However, the smaller cities were given larger samples than their importance in the Canada average warranted in order to meet the need for reliable city estimates. In the same way, samples for small urban, rural non-farm and farm were drawn to provide reliable provincial or, at least, regional estimates. In compiling composite estimates, records were weighted to restore to each geographic area its due importance in the total, thus compensating for variable response rates between areas as well as variable sampling rates. Unlike earlier surveys, no restrictions on family income or family type were imposed, the only eligibility criteria being those designed to exclude families of official representatives of foreign countries living in Canada, and families (or individuals) living full-time in institutions.

In presenting the results, a distinction has been made between spending units which are boarders and those which are not. The tabulations given in this volume exclude boarders. Apart from payment of board, boarding families account for only 0.3 per cent of food expenditures of private households and over 90 per cent of their non-board food expenditure is on food and beverages away from home.

INTRODUCTION

Le présent rapport renferme les résultats d'une enquête effectuée durant 1969 sur les dépenses alimentaires des familles au Canada. Il s'agissait de la première enquête nationale sur l'alimentation depuis 1949; elle visait à la fois la population urbaine et la population rurale. Les enquêtes de cette nature réalisées au cours des vingt dernières années ne prenaient en compte que les familles à revenu moyen dans quelques grandes villes.

Les résultats publiés ici sont les détails des dépenses alimentaires moyennes et des quantités moyennes d'aliments pour les familles et les personnes seules vivant au Canada, par catégorie d'habitat, et par région. Une deuxième tranche du rapport paraîtra plus tard; elle adoptera une approche plus analytique et fera ressortir les rapports entre les dépenses alimentaires et divers attributs des familles, tels le revenu et la composition de la famille. D'autres renseignements recueillis au début de 1970 au cours d'une enquête nationale couvrant l'ensemble des dépenses familiales pour l'année 1969 viendront s'ajouter aux résultats publiés ici et feront l'objet d'une série distincte de rapports.

PLAN ET SELECTION DE L'ÉCHANTILLON

L'échantillon a été tiré dans le cadre de l'échantillon aréolaire de l'enquête sur la main-d'oeuvre. Les ménages ont été sélectionnés par échantillonnage systématique au hasard à partir d'une liste de ménages. On a retenu un échantillon complet de l'enquête sur la main-d'oeuvre puis on a tiré un sous-échantillon pour la présente enquête. Ainsi, contrairement à la méthode utilisée lors des enquêtes précédentes, l'échantillon n'a pas été tiré d'un groupe de ménages préalablement compris dans l'enquête sur la main-d'oeuvre.

La répartition de l'échantillon constituait un compromis entre un échantillonnage égal et un échantillonnage proportionnel à la population. Montréal et Toronto se sont vu attribuer des échantillons plus grands que les autres villes, à cause de leur importance dans la moyenne canadienne. Par contre, on a donné aux petites villes des échantillons plus grands que leur importance dans la moyenne pour l'ensemble du Canada, afin d'obtenir des estimations fiables au niveau des villes. De même, on a tiré des échantillons pour les petits centres urbains, les régions rurales non agricoles et les régions agricoles afin d'assurer des estimations provinciales (ou du moins régionales) fiables. Lors de l'exploitation des estimations synthétiques, on a pondéré les chiffres afin de redonner à chaque région géographique l'importance qui lui revenait dans l'ensemble, compensant de cette façon la variabilité des taux de réponse d'une région à l'autre, de même que la variabilité des fractions d'échantillonnage. Contrairement aux enquêtes précédentes, il n'y avait aucune restriction relativement au revenu familial ou au genre de famille, les seuls critères d'inclusion étant ceux qui visaient à exclure les familles de représentants officiels de pays étrangers vivant au Canada et les familles (ou particuliers) vivant en permanence en institution.

En représentant les résultats, on a fait une distinction entre les unités de dépense qui sont pensionnaires et les autres. Les résultats publiés ici ne prennent pas en compte les pensionnaires. Outre le prix de la pension, les familles en pension n'interviennent que pour seulement 0.3 p. 100 des dépenses alimentaires des ménages privés; plus de 90 p. 100 de leurs dépenses alimentaires hors-pension se rapportent aux aliments et boissons consommés hors de la maison.

SURVEY METHODS AND PROCEDURES

In 1969, monthly samples of approximately 13,000 families and unattached individuals were asked to keep records for two consecutive weeks. The open-book diary was used on which respondents recorded, by item, expenditures and quantities under seventeen broad categories. Provision was made for respondents to record home-grown food (farm and/or garden) and food gifts. Four of the seventeen categories covered certain non-food items purchased for household or personal use, but these expenditures are not included in tables in the present volume.

The collection of quantity information and inclusion of non-food items were important innovations in this survey.

SURVEY RESPONSE

Out of an estimated 15,698 eligible spending units, 10,217 families and individuals, including boarding families, co-operated in providing at least one usable weekly diary. The overall response rate was 65.1 per cent. Of the estimated 5,481 spending units from whom no diaries were obtained, 1,488 were non-contacts, and 3,773 either refused to co-operate or did not provide a diary. A further 220 families were rejected at the editing stage, their information being incomplete. About 6 per cent of families providing usable diaries refused to give income information; their diaries, however, have been included in the tables given in this report.

The information given in the tables is based on 19,267 completed diaries derived from the 10,022 non-boarding families and unattached individuals who provided at least one usable weekly diary.

PRESENTATION OF SURVEY RESULTS

The form of presentation has been designed to facilitate comparisons between expenditure and quantity information, each being given in both per family and per person forms. This has, however, resulted in somewhat bulkier tables, and a restriction on the number of cross classifications which can be conveniently published directly from computer output tables. Thus, the tables in this report represent a selection from a considerably larger number of detailed tabulations.

In obtaining average per person expenditure, aggregates for each item (except board away from home, food and beverages away from home, and the total expenditure) were divided by total number of persons at home plus number of equivalent non-family persons served meals (total number of meals divided by 21). Food and beverages away from home was divided by total number of family persons at home, while the divisor for total expenditure and board away from home included also those persons away from home who recorded board payments for the survey week. A similar treatment was given in deriving per person quantity information. For quantities, however, commodity group totals are not provided.

MÉTHODOLOGIE DE L'ENQUÊTE

En 1969, on a demandé à des échantillons mensuels d'environ 13,000 familles et personnes seules de tenir un journal pendant deux semaines consécutives. Les enquêtes devaient consigner dans un journal, par article, leurs dépenses et les quantités d'aliments, réparties dans dix-sept grandes catégories. Les enquêtes pouvaient consigner les denrées alimentaires qu'ils avaient produites eux-mêmes (aliments provenant de leur ferme et (ou) de leur jardin) et les dons d'aliments. Quatre des dix-sept catégories portaient sur certains articles non alimentaires achetés pour usage personnel ou pour le ménage, mais ces dépenses ne sont pas prises en compte dans les tableaux du présent volume.

La collecte des données sur les quantités et l'inclusion d'articles non alimentaires ont constitué d'importantes innovations à l'occasion de cette enquête.

REPONSES À L'ENQUÊTE

Dix mille deux cent dix-sept familles et particuliers - y compris des familles vivant en pension - faisant partie d'un échantillon estimé à 15,698 unités de dépense, ont participé à l'enquête en remettant au moins un journal hebdomadaire utilisable. Le taux global de réponse a été de 65.1 p. 100. Des 5,481 unités de dépense qui n'ont pas remis de journal, 1,488 n'ont pu être rejointes, et 3,773 ont soit refusé de participer à l'enquête soit négligé de mettre leur journal. Les renseignements de 220 autres familles ont été rejetés au stade du contrôle parce qu'ils étaient incomplets. Environ 6 p. 100 des familles qui ont fourni un journal utilisable ont refusé de donner des renseignements sur leur revenu; toutefois, les autres renseignements qu'elles ont fournis ont été pris en compte dans les tableaux du présent rapport.

Les renseignements donnés dans les tableaux sont fondés sur 19,267 journaux provenant des 10,022 familles et personnes seules ne vivant pas en pension qui ont remis au moins un journal hebdomadaire utilisable.

PRÉSENTATION DES RÉSULTATS

Le mode de présentation des résultats facilite les comparaisons entre les données sur les dépenses et les données sur les quantités qui sont indiquées par famille et par personne. Toutefois, cette forme de présentation a nécessité l'établissement de tableaux plutôt chargés et une réduction du nombre de classements recoupés qui peuvent être facilement publiés à partir des tableaux produits par ordinateur. Ainsi, les tableaux publiés ici sont une sélection tirée d'un nombre beaucoup plus grands de tableaux détaillés.

Pour calculer les dépenses moyennes par personne, on a divisé les agrégats pour chaque article (sauf les dépenses relatives à la pension des personnes vivant hors de la maison, aux aliments et boissons consommés hors de la maison et les dépenses totales) par le nombre total de personnes vivant à la maison plus le nombre de personnes étrangères à la famille (en équivalent) qui ont pris des repas avec la famille (nombre total de repas divisé par 21). On a divisé les chiffres relatifs aux aliments et boissons consommés hors de la maison par le nombre total de membres de la famille à la maison; le diviseur des dépenses totales et de la pension des personnes vivant hors de la maison comprenait également les personnes vivant hors de la maison qui ont inscrit des versements de pension pour la semaine de l'enquête. On a utilisé la même procédure pour calculer les quantités par personne. Toutefois, en ce qui concerne les quantités, les totaux des catégories de denrées ne sont pas indiqués.

NOTES AND DEFINITIONS

Spending Units and Families

The term "spending unit" has been used synonymously with "families and unattached individuals" in this report. The spending unit, which was the operational definition, is an unattached individual or a group of persons living in the same dwelling and dependent on a common or pooled income for the major items of living expense. Unmarried sons or daughters living with their parents are considered as part of their parents' spending unit. However, lodging families, whose heads are in some instances married children living with a parent family, are considered separate spending units. In the majority of the "family" type of spending units, members are related by blood, marriage or adoption, and these are consistent with the "economic family" definition employed in surveys of family income, namely "a group of individuals sharing a common dwelling unit and related by blood, marriage or adoption." The definition of family employed by the population census, however, restricts the family to husband and wife with or without unmarried children living with them or one parent with unmarried children. The unattached individual spending units are financially independent persons living alone or as roomers.

Coverage

The sample of spending units was designed to reflect all areas of Canada, both urban and rural, except the Yukon and Northwest Territories. It refers to families and individuals living in private households but excludes those living in collective households such as hospitals and military establishments. As mentioned earlier in the text, boarding spending units have been excluded from tables given in this volume of the report.

Regions

Refers to a contiguous grouping of the Provinces. Quebec, Ontario and British Columbia are shown separately as Regions, but Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are grouped to form the Atlantic Region and Manitoba, Saskatchewan and Alberta form the Prairie Region.

Urbanization Size Group

Families and unattached individuals living in cities, towns and villages of 1,000 or over, whether incorporated or not, and including urbanized fringes are classed as urban. All others are classed as rural. In some tabulations, a distinction is made between spending units living in urban centres of 30,000 persons and above, and those living in smaller urban centres. Families and unattached individuals living in dwellings situated on farms in rural localities are referred to as rural farm. A farm, following the 1966 census definition, was a holding of one or more acres with sales of agricultural products of \$50 or more. This would include, therefore, families whose income is derived largely from non-farming operations, but excludes farm operators and their families who do not live on their holdings.

Number of Families in Population

This is an estimate of the total number of families and individuals in the population, at mid 1969, in a particular category. It was estimated from the sampling fraction, with an adjustment for non-response.

Number of Weekly Records

Refers to usable records, and number of families in sample refers to those families who provided at least one usable record.

NOTES ET DÉFINITIONS

Unités de dépense et familles

Dans le présent rapport, les mots "unités de dépense" sont synonymes de "familles et personnes seules". L'unité de dépense est définie comme une personne seule ou un groupe de personnes qui vivent dans le même logement et qui mettent leurs revenus en commun pour ce qui est des principaux postes de dépenses. On considère les fils ou filles célibataires qui demeurent avec leurs parents comme faisant partie de l'unité de dépense de leurs parents. Toutefois, les familles en pension, dont le chef est parfois une personne mariée qui demeure avec ses parents, constituent des unités de dépense distinctes. Dans la plupart des unités de dépense du type familial, les membres sont apparentés par le sang, par alliance ou par adoption et répondent à la définition de "famille économique" utilisée dans les enquêtes sur le revenu familial, c'est-à-dire un "groupe de personnes qui partagent le même logement et qui sont apparentés par le sang, par alliance ou par adoption". Par contre, la définition de la famille aux fins du recensement de la population limite la famille au mari et à l'épouse avec ou sans enfants non mariés ou à l'un des deux conjoints avec des enfants non mariés. Les unités de dépense "personnes seules" sont des personnes économiquement indépendantes qui vivent seules ou en chambre.

Champ de l'enquête

L'échantillon des unités de dépense est représentatif de toutes les régions, tant urbaines que rurales, du Canada, sauf le Yukon et les Territoires du Nord-Ouest. Il englobe des familles et des personnes seules faisant partie de ménages privés, mais exclut celles qui vivent dans des ménages collectifs tels les hôpitaux et les établissements militaires. Comme on l'a vu plus haut, les unités de dépense vivant en pension ne sont pas prises en compte dans les tableaux du présent volume.

Régions

Les régions sont un groupement de provinces contiguës. Le Québec, l'Ontario et la Colombie-Britannique sont des régions distinctes; Terre-Neuve, l'Île-du-Prince-Édouard, la Nouvelle-Écosse et le Nouveau-Brunswick forment la région de l'Atlantique, et le Manitoba, la Saskatchewan et l'Alberta, celle des Prairies.

Catégories d'habitat

Les familles et les personnes seules qui vivent dans des villes et des villages constitués ou non de 1,000 habitants ou plus, de même que dans des banlieues urbanisées, sont classées comme urbaines. Toutes les autres sont classées comme rurales. Dans certains tableaux, on a fait une distinction entre les unités de dépense qui vivent dans des centres urbains de 30,000 habitants et plus et celles qui vivent dans des petits centres urbains. Les familles et les personnes seules qui vivent dans des fermes situées dans des régions rurales sont désignées comme rurales agricoles. Une ferme, selon la définition du recensement de 1966, est une exploitation d'une acre ou plus qui a vendu pour au moins \$50 de produits agricoles. Ainsi, les familles dont le revenu provient en grande partie de travaux non agricoles seraient comprises dans cette catégorie, mais les exploitants agricoles et leur famille qui ne vivent pas dans leur exploitation en seraient exclus.

Nombre de familles dans la population

Il s'agit d'une estimation du nombre total de familles et de particuliers d'une catégorie donnée de population au milieu de 1969. Cette estimation est fondée sur la fraction d'échantillonnage, après rectification pour les cas de non-réponse.

Nombre de registres hebdomadaires

C'est le nombre de registres utilisables; le nombre de familles dans l'échantillon représente le nombre de familles qui ont remis au moins un registre utilisable.

Family Incomes

Families and unattached individuals were asked to report income in the past twelve months. However, since the survey was phased in monthly samples throughout 1969, incomes would refer to varying periods ranging from approximately the calendar year 1968 for the January sample, to almost the calendar year 1969 for the December sample. Records were included for families refusing income data if otherwise usable, consequently the average family incomes were based only on those records where income data were given.

Revenus familiaux

On a demandé aux familles et personnes seules d'inscrire leur revenu des douze mois précédents. Toutefois, étant donné que l'enquête a été effectuée par échantillon mensuel, durant l'année 1969, les revenus se rapportent à des périodes différentes s'échelonnant de l'année civile 1968 pour l'échantillon de janvier à l'année civile de 1969 pour l'échantillon de décembre. On a pris en compte les registres des familles qui ont refusé de fournir des renseignements sur leur revenu, s'ils étaient utilisables sous d'autres rapports. Par conséquent, les revenus familiaux moyens sont fondés sur les registres qui contenaient des renseignements sur le revenu.

TABLE 36 AVERAGE WEEKLY EXPENDITURES AND QUANTITIES OF FOOD PURCHASES, 1969
FAMILIES OF TWO OR MORE
ATLANTIC REGION - ALL CLASSES

TABEAU 36 DEPENSES ALIMENTAIRES HEBDOMADAIRES MOYENNES ET QUANTITES MOYENNES D'ALIMENTS ACHETES, 1969
FAMILLES DE DEUX PERSONNES OU PLUS
REGION DE L'ATLANTIQUE - TOUTES CATEGORIES

FAMILY CHARACTERISTICS - CARACTERISTIQUES FAMILIALES

NUMBER OF FAMILIES IN POPULATION - NOMBRE TOTAL DE FAMILLES DANS LA POPULATION	446,104
NUMBER OF WEEKLY RECORDS - NOMBRE DE JOURNAUX HEBDOMADAIRES	4,273
NUMBER OF FAMILIES IN SAMPLE - NOMBRE DE FAMILLES DANS L'ECHANTILLON	2,215
AVERAGE AGE OF HEAD - MOYENNE D'AGE DU CHEF	46.28
AVERAGE FAMILY INCOME - MOYENNE DE REVENU DE LA FAMILLE	6,321.71
AVERAGE FAMILY SIZE - TAILLE MOYENNE DE LA FAMILLE	4.29
AVERAGE NUMBER OF PERSONS AT HOME - MOYENNE DE MEMBRES DE LA FAMILLE A LA MAISON	4.21
AVERAGE NUMBER OF CHILDREN 0-4 YEARS - NOMBRE MOYEN D'ENFANTS ENTRE 0 ET 4 ANS	0.48
AVERAGE NUMBER OF CHILDREN 5-15 YEARS - NOMBRE MOYEN D'ENFANTS ENTRE 5 ET 15 ANS	1.24
AVERAGE NUMBER OF ADULTS 16 YEARS AND OVER - NOMBRE MOYEN D'ADULTES 16 ANS ET PLUS	2.58
AVERAGE NUMBER OF NON-FAMILY PERSONS - NOMBRE MOYEN DE PERSONNES EXTERIEURES A LA FAMILLE	0.06
AVERAGE NUMBER OF PERSONS PAYING BOARD - MOYENNE DE MEMBRES DE LA FAMILLE PAYANT PENSION	0.03
AVERAGE NUMBER OF MEALS TO GUESTS - NOMBRE MOYEN DE REPAS SERVIS A DES INVITES	2.50
AVERAGE NUMBER OF MEALS FREE - NOMBRE MOYEN DE REPAS RECUS GRATUITEMENT	1.01
